I came to Hawaii from Ontario, Canada in 1996 to escape the cold and have been a Big Island resident ever since. I began my career in real estate after 8 years experience in the construction and building industry where I met my husband, a Hilo native and General Contractor. In our spare time we are involved in a non-profit dedicated to bringing affordable housing to low income families through the training and counseling of teenagers in a construction capacity.

I am passionate and enthusiastic about real estate and I strive for excellence in what I do. To this end, education is very important to me--just ask me what class I am signed up for next! My primary goal in keeping current with market and industry trends is to bring the power of that knowledge to the table to benefit my clients.

I feel that I have been blessed through the experience of being a realtor and consider it my privilege to work with you. As a multi-million dollar producer, I treat every transaction, big or small, with the highest degree of professionalism. My passion is to make your dreams a reality. My commitment is to your satisfaction with your real estate transaction. Please contact me if I can be of assistance as you prepare to list your property or begin your Big Island home search.
